

ABOUT FELLOWSHIP

For Advancing career growth as a General Practitioner & Physician, it is important to keep updating one's Clinical & Diagnostic skills. Omnicuris in association with the Royal College of Physicians for General Practitioners is introducing a Certificate program of 12 months. This online virtual Fellowship gives Global recognition along with opportunities for carrying out Leadership roles. It's a Comprehensive program of four modules covering topics from Introduction to Royal College of General Practitioners (RCGP) and its curriculum, primary care & patient–centric care as they present in National Health Service (NHS) centers. Learnings include the Management of patients irrespective of race, social status, and ethnicity. This Certificate Program is a unique opportunity helpful in promoting clinicians career development and getting due credentials.

ABOUT

ROYAL COLLEGE OF GENERAL PRACTITIONERS

The Royal College of Physicians (RCP) is a Highly recognized British professional membership body dedicated to improving the practice of medicine, chiefly through the accreditation of physicians by examination. It is the oldest medical college in England Founded by royal charter in 1518. RCP was the first association to introduce international standards in the classification of diseases. The goal of RCP is to bring improvement in health healthcare through advocacy, and education, and research.
